## TO WHOM IT MAY CONCERN

It is my pleasure to write about **Ativ Joshi**. Ativ was working as a summer intern at IIT Gandhinagar with me. He studied the problem of sparse polynomial interpolation and the sparse GCD computations for multivariate polynomials. He has excellent programming and analytical skills. He can quickly understand new and nontrivial topics. Though he is a student of Computer Science, he has excellent mathematical maturity. I am very happy with his performance as a summer intern.

I wish him all the best in all his future endeavor.
